## Skills

### Programming Languages

Java  
Python  
C# .NET  
Javascript (ES7+)

### Libraries & Frameworks

Ruby on Rails  
Django  
PostgreSQL  
PyTest  
JUnit  
NumPy

### Development Tools

Unity (game engine)  
Docker  
Jenkins  
iOS  
AWS  
Appium  
Agile & Git workflow

### Web

Html, CSS  
React.js  
Node.js

## Project

### Casino VR, Behavioral Economics

Virtual reality casino environment, built using C#, Unity (game engine) & SQL, to conduct experiments on risk aversion behavior

## Education

### BA in Computer Science, Honors

McMaster University

Graduated May 2022

## Experience

### Software Engineer

Equestrian Show Manager | Hamilton, Canada

6 mo, Mar - Aug 2021

- **Project Owner & lead full-stack Engineer**
- Moved **manual-in person payment to an online authenticated payment service**, using Ruby on Rails, Javascript and the Square API
- Rewrote our frontend components in React.js to improve user experience & received **positive reviews**

### Software Engineer

theScore | Toronto, Canada

1.5 yr, Apr 2018 - Aug 2019

- Collaborated across multiple teams to **develop, test & launch** theScore's Android & iOS mobile gambling applications
- Responsible for testing **Geolocation & Bet API**, to verify betting features are inaccessible in States with an effective online gambling ban
- Automated testing for various network connection health & types

### Software Engineer Co-Op

theScore | Toronto, Canada

1 yr, May 2016 - Aug 2017

- Developed a **UI test automation** framework with Appium for Android and iOS applications, **reducing a 2 week manual testing process to a 15 hour automated CI/CD pipeline**

### Software Engineer in Test (SDET)

Urbint | NYC, USA

6 mo, Aug - Dec 2021

- Developed a tool & web-app to monitor & conduct performance tests for the Urbint API & visualize metrics, integrated with Datadog, Jenkins & Docker
- Profiled API & SQL queries, and optimized them to **decrease average HTTP request response rate by -63% (800ms to 300ms)**
- **Rewrote & modernized documentation for test infrastructure reducing new hire ramp-up time from 1 week+ to 1 day**
